

Flintstones Decal Application Instructions

IMPORTANT TO REMOVE WAX FROM THE PLAYFIELD FIRST!

1. Trim the exterior of the decal in a few key spots so that you may exactly line it up with the black border on the playfield.
2. Take 2 small tabs of masking tape and tape in place.
3. Run a piece of masking tape horizontally all the way across the decal about 2/3 rds of the way down from the top.
4. Remove the 2 small tabs of masking tape.
5. Separate the top portion of the decal from the backing paper.
6. WITH A SCISSORS, cut off that section of backing paper.
7. With a small plastic squeegee or Credit Card, begin to apply the decal from the masking tape up, in a back and forth sweeping motion over the top of the decal. Pressing firmly.
8. Once down, remove the horizontal masking tape.
9. Repeat steps 5 through 7 with the lower portion of the decal.
10. Remove the front application tape. Carefully pull it off at as much of a direct angle from the decal.
11. Give it a light coat of wax.
12. "Lets play some pinball!"
