F	Rubber Ring - White 1-1/4" id	1
G	Rubber Ring - White 2" id	2
H	Rubber Ring - White 2-1/2" id	2
I	Rubber Ring - White 3" id	2
J	Rubber Shooter Tip - White	1
K	Rubber Flipper - Red 1/2" x 1/2"	2
L	Rubber Sleeve - Black 1"	13
M	Rubber Sleeve - Black 7/8"	4
N	Mini Post Ring - White 7/16" od	13

World Cup Soccer was manufactured with only one item G and item I rings installed. However, users have stated the ball gets hung under the ring and so we recommend installing two rings in those locations.

PCX PINBALL SUPPLY, LLC

Rubber Ring Sizing Chart

Ring Coatings - All of our rings are fresh and less than a few months old. Some may feel dryer than others giving the appearance of being old, but it is just the amount of mold release on the rings. Pinball rings are made in injection molding machines, these molds must be sprayed with a mold release agent in order for the finished rings to come out of the mold. We recommend all the rings be cleaned with rubbing alcohol just prior to being installed on the pinball machine. This step is not required, but is very helpful in removing any fingerprints, oils and simply maintaining the looks and cleanliness of the playfield.

Ring Color - Just about all pinball machine manufacturers have gone out of business and so there is a limited supply of rubber manufacturers producing rings for pinball machines. Therefore, the ring color is not consistent between them, and so you may find some rings that are snow white and others that are an off white. We regret the slight color differences, but it's getting harder to find manufacturers willing to produce a few thousand rings for pinball machines.
