

A close-up photograph of a mechanical assembly, likely a part of a machine. A prominent red cylindrical handle is visible on the left side. A blue arrow points from a text box to a specific adjustment point on the mechanism. The assembly consists of various metal parts, including a large black gear-like component on the right and several thin metal rods or levers. The background is a metallic surface with various holes and components.

I adjusted this cam and almost totally closed this gap to get to the proper stop position.
