

MMR Upgrade RGB Speakerpanel

When you get your kit, the new XL display will only have the blue color active.

If you own the TOPPER PCB which is NOT included at the display kit, but is included at the „RGB GI KIT“ or „TOPPER KIT“ you are able to activate this also.

have fun and stay healthy

tom aka kapsreiter www.freaktech.at

This is the connector for the „Backboard RGB strip“ which is included at the „RGB GI KIT“

This is the „RGB speaker cable“
Remove the 4 pins from this housing

Ad this pins to the „BACKBOARD RGB strip“ connector PIC 1
