≡ MENU

Monster Bash Remake is the highly anticipated third game in our series of remakes of the greatest Bally and Williams pinball machines.

Monster Bash Remake was recreated to exceed the high standards of the original game. By using modern electronics, LED lighting, and today's manufacturing technology, Monster Bash Remake will provide the pinball experience you have grown to love along with the reliability and craftsmanship that is demanded in today's pinball market.

Monster Bash Remake is available in three models specifically designed for each level of the pinball marketplace. Monster Bash Remake is available in: the **Classic Edition**, the **Special Edition**, and the **Limited Edition**. **ALL** three models include numerous features that were never before available and are **exclusive** to Monster Bash Remake.

Custom Topper (Limited Edition Only)

The Monsters are ready to rock and have hit the stage in this custom 3D sculpted topper only available on the Limited Edition. This custom topper features Frankenstein, Dracula, and the Bride of Frankenstein on the stage in their full glory. These creatures are over 7" tall and are a beautiful addition to the Limited Edition. Integrated LED lighting casts a ghoulish glow on the monsters as they perform on this stage.

Front Molding (Limited Edition Only)

The stunning Electric Blue Metallic Front Molding is adorned with a one of a kind photoengraved stainless steel piece of artwork that was created just for the Monster Bash Remake Limited Edition. You can feel and see the amazing detail and craftsmanship that was put into the Limited Edition.

Interactive RGB General Illumination (Limited and Special Editions Only)

For the first time ever, Monster Bash Remake will have fully interactive RGB General Illumination. Monster Bash Remake changes the general illumination of the playfield to enhance the playing experience. Watch as each monster now has their own unique light show to add to their eerie performance.

Decorated Monsters

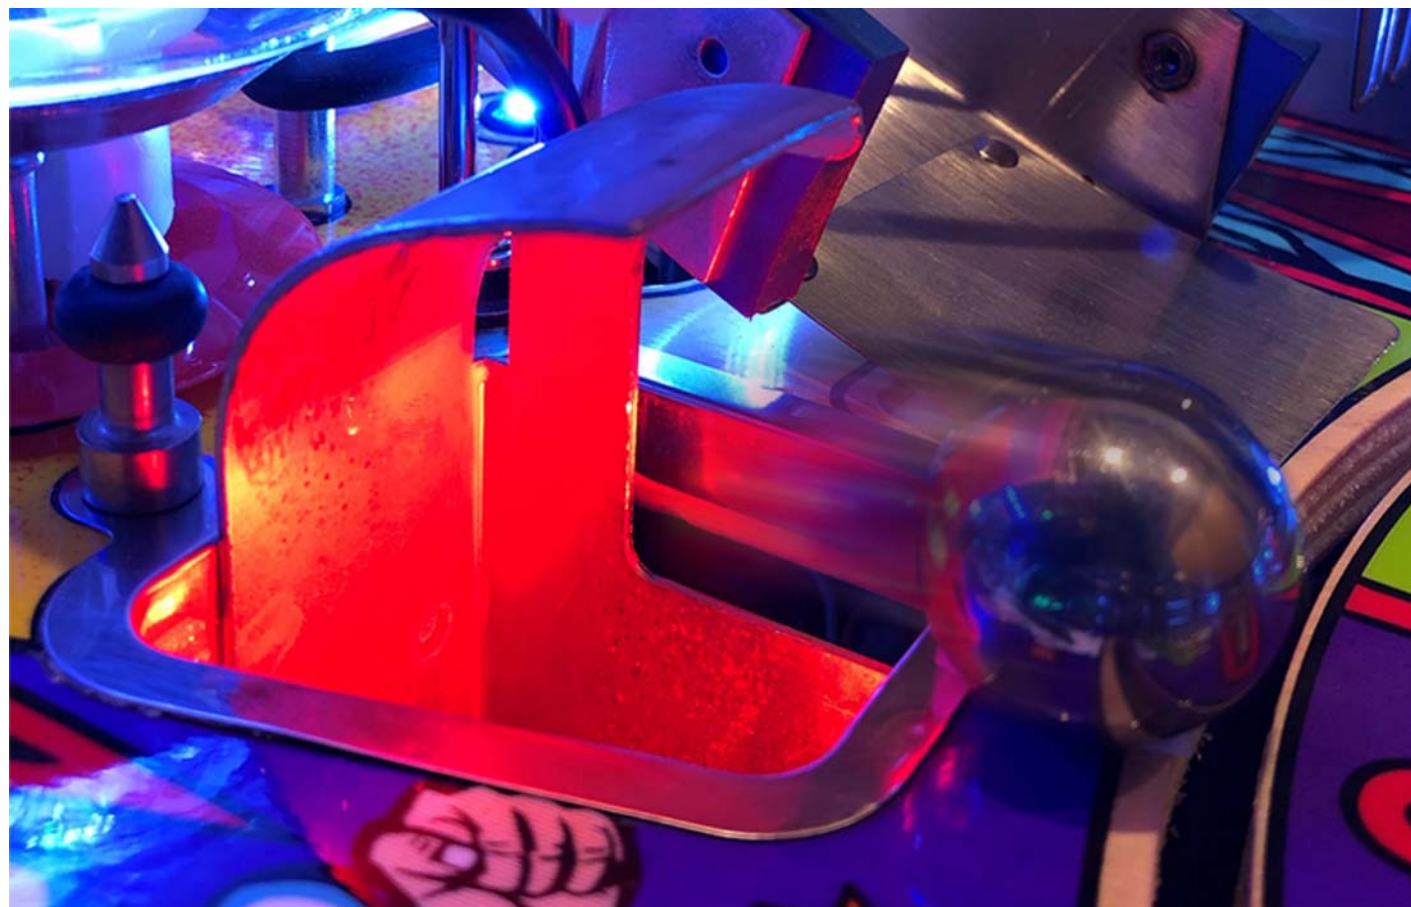

LED Lit Popper (Limited and Special Editions Only)

Monster Bash Remake features a custom LED lit popper. During normal game play the popper is blue and blends with the lighting of the playfield, but when you make the shot, the popper turns red and then launches the ball out to continue your quest to create the greatest concert of the centuries.

LED Lit Moving Targets (Limited and Special Editions Only)

Watch as Frankenstein is being put back together. Every hit to the moving targets not only helps you get Frankenstein on stage, but also changes the moving targets lighting from green to red.

Plasma Disk (Limited and Special Editions Only)

Dr. Frankenstein Has been very busy lately. He built a plasma disk in his lab to increase the power to Frankenstein and the whole Monster Bash remake game. Watch it come to life as everything needs more power!

LED Drac Coffin (Limited Edition Only)

Dracula decided to join in and added some extra LED lighting to his coffin. Watch out though when his coffin glows, he will be coming out to join the band.

Premium Enhanced Sound System (Limited and Special Editions Only)

Sound is a crucial component of the player's experience. The system's class D digital amplifier

powers two 120-watt poly-cone coaxial speakers and a single 8" 190-watt poly-cone woofer to provide an unprecedented immersive audio experience. Additionally, owners are now able to control the balance between the speaker panel and the cabinet woofer. Whether you prefer thumping bass or something more traditional, you now control your audio experience.

The speakers are illuminated with red, green and blue tri-color LEDs. These are utilized to create lighting effects which have been integrated into gameplay.

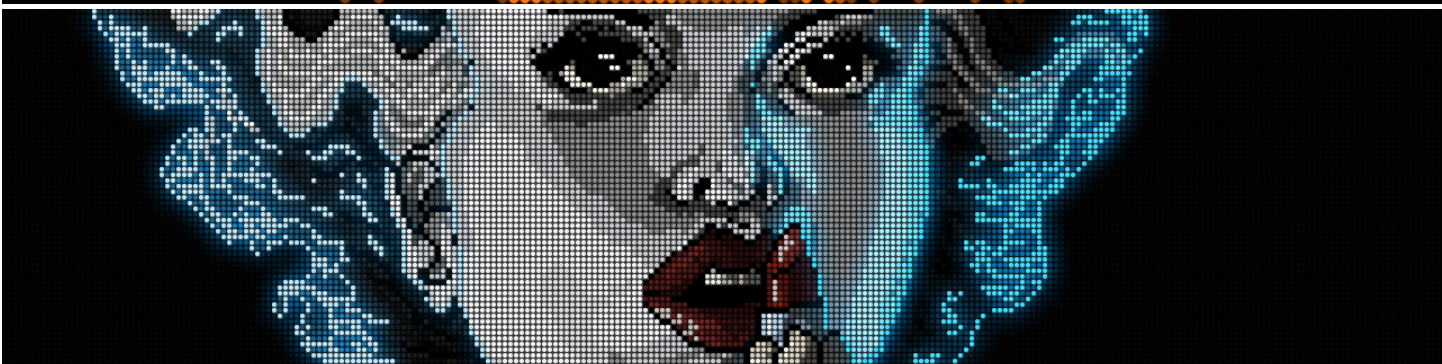

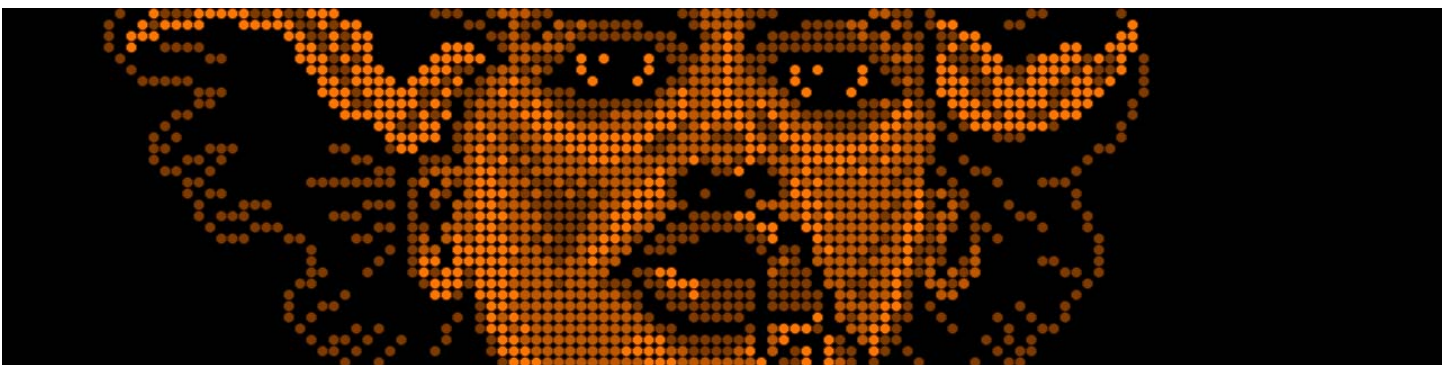

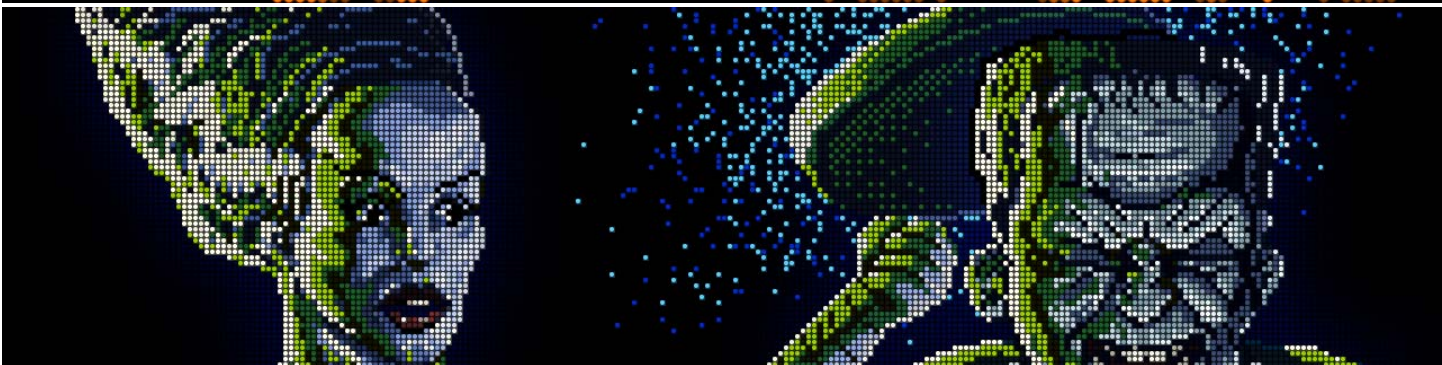

XL Display - Nearly 2x the viewable area! (Limited and Special Editions only)

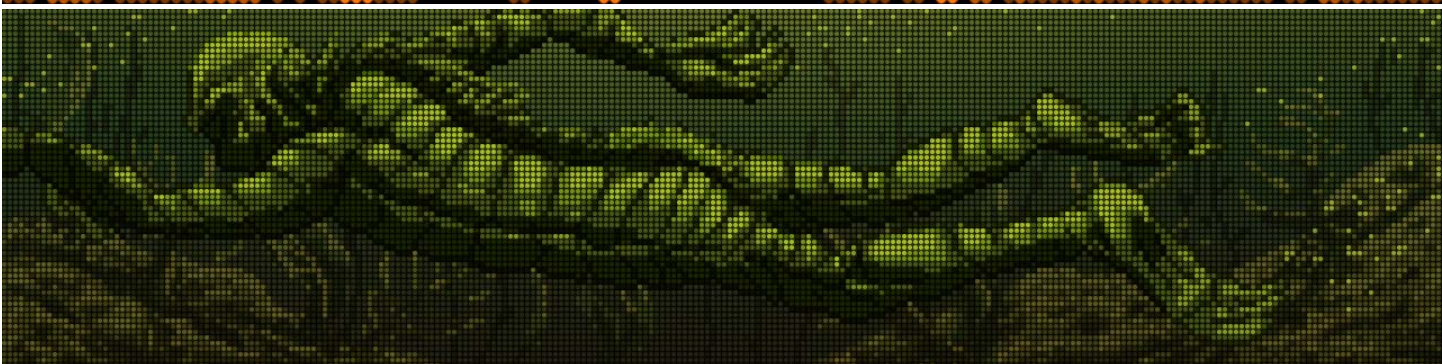

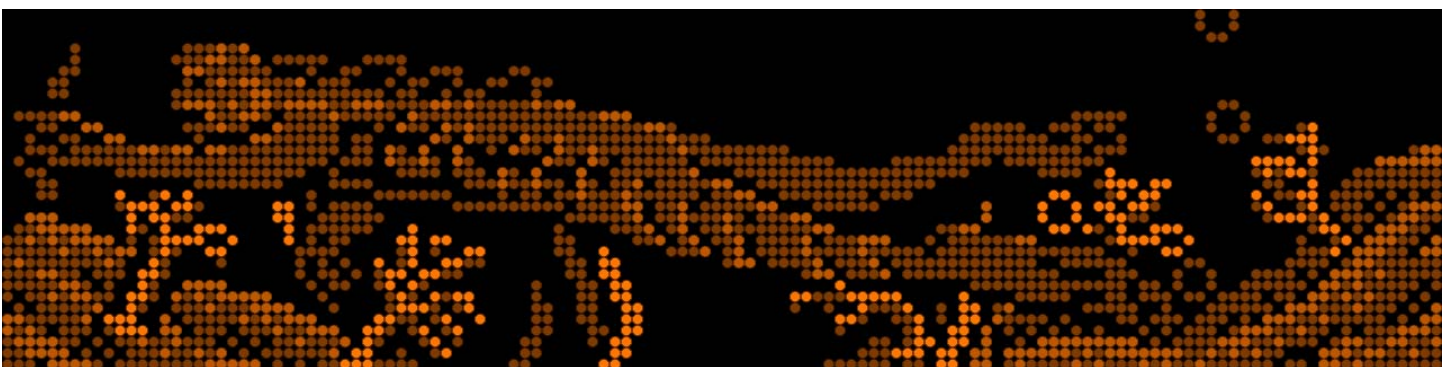

HD Color Upgrade (Limited and Special Editions Only)

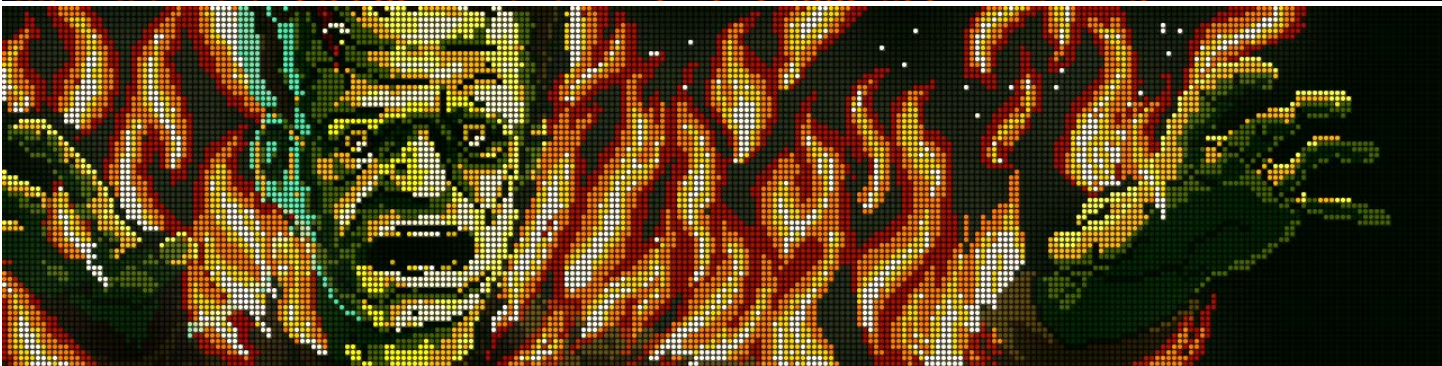

ATHYRIO GAMES has done it again and created all new full-color display artwork, re-imagined within the framework of the original Williams display artwork at four times the resolution. Nearly 3,300 frames have been painstakingly animated to create a display that features full color and four times the number of dots as the original Williams game.
